

To whom it may concern:

I highly recommend S-Works Construction Company. When we began our project, we received five bids. S-Works was not the lowest nor the highest. However, we felt they could get the job finished the fastest and were the best equipped to overcome any potential hurdles or unforeseen problems.

Prince William County threw us several curve balls during the construction of the building. Joe and his team were able to navigate effectively through the unforeseen circumstances and Joe personally acted on my behalf to keep the project moving forward.

S-Works has completed three commercial projects for us from a new building, to modifying an existing warehouse space to renovating after a fire. I highly recommend Joe and the team at S-Works Construction.

Respectfully,
