

JAMES RIVER Baptist Church

To Whom It May Concern:

S-Works was selected by the congregation at James River Baptist Church to construct the Multi-Ministry building consisting of approximately 10,000 square feet for multiple uses including a Worship/fellowship area, full kitchen, restrooms and educational rooms.

The coordination by his office with his sub-contractors and promptness in resolving issues was excellent. We recommend his company for future projects and invite anyone to stop by and see their work for themselves.

Thanks to S-works for a well done project.
